

WEBINAR

The ENERGYCoP Platform: Ensuring coordination among humanitarian actors in the energy sector

Thursday, November 9th 2017, 3:30 pm – 5:00 pm CET (9:30-11:00 EDT)

Introduction

Maximizing impacts in humanitarian field interventions requires integrating the perspectives of many different sectors. Open resources and collaboration tools are essential to this effort. They ensure proper coordination among the key stakeholders engaged in providing safe access to fuel and energy (SAFE) to crisis-affected populations.

This webinar, organized within the Sustainable Energy Technologies for Food Security ([SET4food](#)) project and hosted by the [Global Alliance for Clean Cookstoves](#) on behalf of [SAFE Humanitarian Working Group](#), presents the **ENERGYCoP platform**: a global not-for-profit community of practice aimed to serve humanitarian professionals working in the energy sector. Its purpose is to facilitate coordination among a diverse network of stakeholders engaged in providing access to fuel and energy for cooking, lighting, heating, powering, and preservation in crisis settings, such as refugee camps or emergency aid operations. ENERGYCoP is designed to be an interactive space with an open-knowledge approach that enables practitioners to search for and share projects, technologies, tools, and resources specifically related to energy access in humanitarian settings, as well as ask for advice and contribute to online discussions. The webinar will introduce the platform, its features, and some of its key resources, in addition to discussing the need for its existence. It will conclude with a brief Q&A from participants.

Created in the framework of the SET4food project and managed by the SAFE Humanitarian Working Group (SAFE WG), ENERGYCoP is funded by the [European Union Civil Protection and Humanitarian Aid](#).

Agenda

- 3:30 - 3:40 Introduction of the webinar
Moderator: Daphné Carliez - SAFE Global Coordinator and Communications, Climate and Disaster Risk Reduction Programme Unit, United Nations World Food Programme HQ
- 3:40 - 3:50 The role of energy in food security in emergency settings
Didier Habimana – Consultant, Food and Agriculture Organization of the United Nations
- 3:50 - 4:00 The SET4food project: an overview on the ENERGYCoP background
Cristina Sonzogni - SET4food Coordinator, COOPI Innovation and Program Quality Department
- 4:00 - 4:20 ENERGYCoP: features of the new global platform for humanitarian actors in energy interventions
Kathleen Callaghy - Program Associate, Humanitarian - Global Alliance for Clean Cookstoves
- 4:20 - 4:30 Focus on some ENERGYCoP's contents: decision-making supporting tools in energy humanitarian interventions
Jacopo Barbieri - Politecnico di Milano, Energy Department
- 4:30 - 5:00 Questions & Answers
Moderator: Daphné Carliez - SAFE Global Coordinator and Communications, Climate and Disaster Risk Reduction Programme Unit, United Nations World Food Programme HQ

Speakers

Didier Habimana - Consultant, Food and Agriculture Organization of the United Nations (FAO)

Didier Habimana is post graduate in natural resource management, currently supporting on-going work related to the assessment on the extent and effectiveness of community-based forestry highlighting the central role communities, indigenous people and small-holders play in sustainable forest management. His terms of reference in the FAO also include supporting work related to finalizing knowledge generation and dissemination materials of the Energy Programme, specifically on SAFE and bio economy in emergency and protracted crises settings.

Cristina Sonzogni - SET4food Coordinator, COOPI - Cooperazione Internazionale

Cristina Sonzogni is Project Management expert in international cooperation and humanitarian aid. She has been working for almost 10 years overseas in development and emergencies contexts, leading projects for different NGOs mainly in the Saharawi Refugee Camps of Algeria, in Burkina Faso and in Mozambique.

She joined the Italian NGO COOPI in 2016: she is part of the Program Quality and Innovation Office of the HQ in Milan, from where she coordinates the second phase of the SET4food (Sustainable Energy Technologies for Food Security in Humanitarian contexts), a multi-stakeholders project aiming to enhance efficient collaboration and synergies among humanitarian actors in the energy sector.

Kathleen Callaghy - Program Associate, Humanitarian, Global Alliance for Clean Cookstoves

Kathleen Callaghy manages the day-to-day activities of the humanitarian program at the Global Alliance for Clean Cookstoves, which seeks to reach the world's most vulnerable populations with cleaner and/or more efficient cooking solutions. Among other activities, she coordinates the [Safe Access to Fuel and Energy \(SAFE\) Humanitarian Working Group](#) and advocates for the greater inclusion of energy access in humanitarian response. Kathleen holds a Masters in Comparative Ethnic Conflict from Queen's University Belfast, Northern Ireland, and a BA in Government & Legal Studies from Bowdoin College.

Jacopo Barbieri - Researcher, Politecnico di Milano, Energy Department

Jacopo Barbieri graduated in energy engineering at Politecnico di Milano. He works as projects manager and researcher on energy planning and assessment, Integrated Renewable Energy Systems (IRES) and appropriate technologies, with a specific focus on humanitarian settings. Within the SET4food project, he manages the

activities for which Politecnico di Milano is responsible of. He worked on short and long term assignments in Mozambique, Angola, Tanzania, Ethiopia, Kenya, Lebanon and Nepal for assessments and feasibility studies as regards access to energy in collaboration with NGOs, private stakeholders, Universities and International Agencies.

Facilitator

Daphné Carliez- SAFE Global Coordinator and Communications, United Nations World Food Programme (WFP) HQ

Daphné Carliez (BSc, MSc) is the SAFE Global Coordinator for the World Food Programme's Climate and Disaster Risk Reduction Programme Unit in Rome. In this role she is responsible for the development, coordination and scale-up of WFP's Safe Access to Fuel and Energy (SAFE) programme. Daphné works on energy and energy-related issues relating to gender, nutrition, protection, education, health and environment, has developed SAFE tools and guidance, advocated for policy and strategy change and led a communications campaign on the issue of energy access in humanitarian settings. In her position as Global Coordinator she is co-chair to the SAFE Working Group. Prior to her position at the World Food Programme she was a Communications and PR advisor to companies such as Nike, Starbucks and Shell as well as several small sustainable community development projects in Uganda.
