*USAID funded **Catalyzing Clean Energy in Bangladesh (CCEB)** will be hosting the Third Annual Market Facilitation Platform for Improved Cookstoves, as part of its effort to create vibrant and enabling environment for market development in new ICS technologies in Bangladesh.*

When: Wednesday, September 16, 2015

Time: 10:00 a.m. – 5:00 p.m.

Venue: Windy Town, Bangabandhu International Conference Centre (BICC), Dhaka

If you have any questions, please e-mail Mr. Anowar Hossain Mollah at amollah@cleanenergy-bd.org or 0088-01788818940

The CCEB program will build a sustainable market for improved cookstoves in Bangladesh to reduce energy consumption and pollutant emissions by developing sources of finance for consumers and cookstove entrepreneurs; strengthening businesses involved in the supply chain; and better understanding consumers in order to generate market demand.

"CCEB project is being funded by the United States Agency for International Development (USAID). USAID's CCEB project is an initiative of the US Government. The U.S. Government, through USAID, has approved over \$5.8 billion in development assistance to Bangladesh since 1971. In 2011 alone, USAID provided more than \$180 million to improve the lives of people in Bangladesh. USAID supports programs that: promote democratic institutions and practices, expand food security and economic opportunity, improve health and education services, and increase resiliency to climate change through adaption and low carbon development".
