The UK Shelter Forum is a community of practice for individuals and organisations involved in shelter and settlement reconstruction activities after disasters.

This year, the Forum’s theme of “Health and Shelter” will cover a wide range of topics and areas of interest and concern, including issues that relate to both psychological and physical health and well being. The meeting will consider issues of shelter from a Health Sector perspective and how this could influence the way we work. There will be opportunities for presentations and discussions on technical, policy and programmatic subjects. The agenda will be produced based on the submissions of the participants, with priority given to those that adhere to the theme.

Note: A Technical Workshop, also on the theme of Health and Shelter, will be held at the University of Bath on 9th May 2019.
